Subject index

Acne 524
– inflammation 162
Actinic elastosis 506
Adenylate cyclase 91
Alkyl methanesulphonates 387
Allergen-specific T-cells 71
All-*trans* retinoic acid 100
Alopecia areata 86, 133
Amino acids 342
Anchoring filaments 529
Androgen(s) 269, 289
Anthralin (dithranol) 186, 483
Antigen mapping 529
– processing 251
–-presenting cell 251
Anti-inflammatory substances 278
Antikeratin 14 antibody 405
Antioxidant enzymes 449
Antiphospholipid antibodies 411
Anti-RNP antibody 258
Arachidonic acid 77
Atopic dermatitis 71, 219, 230, 292, 382
– eczema 5
Atrophy 372
Autoantibodies 395, 418
Autosomal dominant ichthyosis vulgaris 421
Azelaic acid 162

Barrier function 342
Basal cell carcinoma 113
Beta-adrenergic antagonist 472
– receptor 91
Beta-adrenoceptors 328
Bioassay 131
Bioenergetics 186
Blistering skin diseases 529
Bovine collagen implant 395
Bullous pemphigoid 131, 400
– – antibody 400

C1q 395
Calcium transport 449
Capsaicin 414
Catecholamines 328
CD271 100
CD27 533
Cell culture 149
– differentiation 119
– surface glycoproteins 357
Ceramide 1 219
Chemiluminescence 362
Chemotaxis 135
Chronic venous insufficiency 485
Collagen metabolism 506
– metabolites 289
Complement genes 281
Compressive bandaging 485
Congenital naevocytic naevi 438
Contact allergens 133
– dermatitis 251, 387
Corneocyte cohesion 167
Corneosomes 167, 174
Cornified envelopes 512
Corticosteroids 262, 372
Croton oil 246
Cutaneous oxygenation 285
– reaction 414
– T-cell lymphoma 81
Cyclosporin A 198
5-S-Cysteinyldopa 7
Cytogenetics 81
Cytokeratins 300

DACM 491
Dermis 519
Desmosomes 174
Desquamation 108, 174
2′,7′-Dichlorofluorescin diacetate 474
Digital imaging microscopy 91
Dihydrotestosterone 476
Dihydroxyacetone 417
2,4-Dinitrofluorobenzene 251
Diphenylcyclopropenone (DCP) 133
Disease marker 533
Dithranol (anthralin) 262, 333, 337
Domestic mammals 16
Down-regulation 333

Ear swelling response 246
Eccrine gland differentiation 357
– poromas 300
EGF 516
– receptor 125
Eicosanoids 77, 135
Electron microscopy 211, 274, 377
ELISA 131
Endothelial cells 149
Eosinophil cationic protein 5
Epidemiological study 366
Epidermal 12-HETE receptors 333
– cells 135
Epidermal–dermal junction 310
Epidermis 113, 317, 474, 519, 537
Epidermolysis bullosa simplex 1
Epithelial antigens 357
Erythromelalgia 535
Estradiol 258, 476
Eumelanin 7
Extracorporeal photopheresis 81

Familial benign chronic pemphigus 537
Fibroblasts 86, 96, 461
Fibronectin 86
Filaggrin in immunoelectron microscopy 421
Free radical generation 162
– radicals 262
Fura 2 91

Gene expression 269
Glucocorticoids 292
Glycoconjugates 180, 537
Glycosidases 174
Grass pollen 71
Growth factors 321
– stimulatory factors 461

HaCaT cell line 328
Hair apparatus ultrastructure 233
– bulbs 274
– follicles 86, 321
Hemidesmosome 310
Heparan sulphate proteoglycan 86
12-HETE 135
Histamine 414
Histopathology 211
HLA 281
HLA-A2-Bw46-DRw8 Haplotype 347
Horny layer 342
Human anagen hair apparatus 180
– collagen 395
– epidermis 91
– hair 476
– keratinocytes 337
– papillomavirus 445
– plantar skin 377
– skin 487
Hydration 342
Hydroxyestrone 258
5-Hydroxy-6-methoxyindole-2-carboxylic acid 7
Hyperpigmentation 162
Hyperproliferation 465

Ichthyosis 141, 211
IgE 5
IgG subclass 400
Immune lymph node cell proliferation 203
– response 395
Immunogold labelling 421
Immunohistochemistry 10, 519
Immunosuppression 133
In situ hybridization 113, 351
In vitro growth behavior 476
Indirect immunofluorescence assay 535
Induction of collagenase mRNA 506
Inflammatory linear epidermal naevus 491
Initial lymphatics 240
Integrins 1
Interfollicular keratinocytes 476
Interleukin-1 351
Interleukin-2 receptor(s) 138, 533
Interleukin-6 receptor 351
Interleukins 71
Intracellular free calcium 91, 96
Involucrin 491
Irritant contact dermatitis 246

Keratin 17 480
– expression 465
Keratinization 141, 491
Keratinocyte differentiation 125
– proliferation 456
Keratinocytes 258, 328
Keratohyalin, bicomponent granules in ridged skin 421
–, heterogeneity of 421
Köbner effect 465

Laboratory animals 16
Lamellar body 141
Laminin 86
Langerhans cell(s) 10, 198, 251, 474
Lectins 149, 180, 292, 537
Leukotriene antagonists 278
– B_4 158
Lichen planus 433
– sclerosus 445
Lipids 167, 191
Lipometre 372
Lipoperoxidation 191
Liposomes 483
Localized scleroderma 418

Macrophage migration inhibition factor (MIF) 472
Mast cells 433
Melanocyte(s) 119, 274, 474
Melanomas 500
Melanosome classification 438
– ultrastructure 438
Membrane receptor mechanisms 328
Mesenchymal cells 321
5-Methoxypsoralen 297, 487
Mice 262
Migration inhibitory factor (MIF) 246
Minocycline 524
Mitochondria 186
Mixed skin lymphocyte reaction 198
1-2B7B Monoclonal antibody 310
Monoclonal antibodies 149
Mouse ear test (mouse model) 387
Murine contact photosensitivity 203

Naevi 500
Natural moisturizing factor 342
Negro 274
Nerve fibres 519
Neurofibroma 13
Neuron-specific enolase 10
Neuropeptides 230
Neutrophil chemotactic factors 524
– elastase inhibitor 224
– functions 162
– oxygen metabolism 524
Neutrophils 158
Normal skin 512

Oculocutaneous albinism 7
Oedema 485
Oleate 219
Oligosaccharides 174
Oncogenes 500
Organ symptoms 418
Outer root sheath 180
– – – keratinocytes 476
Oxidation 474
Oxidative metabolism 362

Peptide pattern 512
Percutaneous absorption 487
Perineurial cells 13
PGP 9.5 519
Pharmacokinetics 297
Pharmacological model (contact dermatitis) 278
Pharmacology 297
Pheomelanin 7
Phorbol 12-myristate-13-acetate 119
Phospholipids 483
Photosensitivity 417
Pilosebaceous glands 269
Plantar stratum corneum 108
Platelet 411
PMN 362
Polymorphonuclear leukocytes 77
Poxvirus 535
Propranolol 472
Protection 174
Protein kinase C 456
Proteinase 108
Proteins 167
Proteolysis 174
Proteolytic enzyme 377
Psoriasis 77, 138, 158, 224, 281, 351, 405, 433, 456, 465, 472, 480, 516, 519, 533
Psoriatic arthritis 347
– skin 512
PSS 96
Pulsed field gel electrophoresis 281
Radioimmunoassay 230

RAI (relative alkylation index) 387
Reactive oxygen species 456
Retinoids 149, 158
Rhino mouse skin 100

Savinase 377
Scleroderma 285, 289, 461
Seborrhoeic keratosis 405
Sebum 372
Sebutape 372
Sensory nerves 433
Serine proteinase 108
Serum C4 and C4a levels 347
Sex hormones 289
Sheep 321
Sjögren – Larsson syndrome 141
Skin 240
– blood flow 285
– irritation 262
– pH 16
– sensitization test 387
– surface 191
SLE 411
Solitary neurofibroma 13
Split skin studies 529
Squalene 191
Squamous carcinoma cells 125
Squaric acid dibutylester (SADBE) 133
Stability 483
Stratum corneum 167
Sub-basal dense plate 529
Subminimal inhibitory concentrations 524
Subungual neurofibroma 13
Suction blister fluid 297
Superoxide dismutase 317
Supratype 281
Sweat gland ducts 300
Sweating response 382
Systemic lupus erythematosus 258
– sclerosis 366

Tachyphylaxis 337
Tenascin 86
Testosterone 476
3,3′,4′,5-Tetrachlorosalicylanilide 203
Therapy 480
Thin layer chromatography 411
Thrombosis 411
Tiflucarbine 456
Tinea barbae 233
– capitis 233
TNF 131
TNFα 362
Tolerance 337
Topical immunotherapy 133
Transepidermal water loss 382
Trichophyton rubrum 233

Ultrastructure 100, 141, 491
Ultraviolet A radiation 203
Urine 516
Urogastrone 516
UV radiation 191
UVA irradiation 506
UVB irradiation 317

Vasoactive intestinal polypeptide 230
Vasoconstriction 485
Very late antigens 1
Vulvar dystrophies 445

Water-barrier function 219
Western blot 400

Xeroderma pigmentosum 449
